

IN THE CLAIMS:

Please cancel claims 1-3 without prejudice to or disclaimer of the subject matter recited therein.

Please add new claims 4-6 as follows:

LISTING OF CURRENT CLAIMS

Claims 1-3. (Canceled)

4. (New) A golf club bag comprising:

- a) a bag having a top opening and a bottom;
- b) a pivotal section located on a top of the bag;
- 5 c) two symmetrical supporting arms pivotal between open and closed positions and having a first end pivotally connected to the pivotal section;
- d) an embedding element connected to the bottom of the bag;
- e) two steel cables, one of the two steel cables is connected at a first end to the first end of one of the two symmetrical supporting arms and at
10 a second end to the embedding element;
- f) at least one socket pivotally connected to the bottom of the bag;
- g) at least one upholding post movable between upright and tilted positions relative to the bottom of the bag, one of the at least one upholding post is connected at a first end to the top of the bag and at
15 a second end to each of the at least one socket; and
- h) a fixing plate connected to center sections of the two steel cables,
wherein, when the at least one upholding post is located in the upright position, the two steel cables move the two symmetrical supporting arms into the closed position, and, when the at least one upholding post is located in the tilted
20 position, the two steel cables move the two symmetrical supporting arms into the open position.

5. (New) The golf club bag according to claim 4, wherein each of the at least one socket includes a blocking element limiting a pivotal movement of one of the at least one upholding post.

6. (New) The golf club bag according to claim 4, wherein the bag includes a lower opening in a periphery thereof, the embedding element is located on an interior of the bag, and the two symmetrical supporting arms extend through the lower opening.
